DESCRIPTION OF PROBLEM
<p>1. The first problem is the lack of a clear definition of the problem. This is often the case when a problem is first identified, and the nature of the problem is not fully understood. This can lead to a lack of focus and a lack of direction in the solution process.</p> <p>2. The second problem is the lack of a clear understanding of the resources available. This is often the case when a problem is first identified, and the resources available are not fully understood. This can lead to a lack of focus and a lack of direction in the solution process.</p> <p>3. The third problem is the lack of a clear understanding of the constraints. This is often the case when a problem is first identified, and the constraints are not fully understood. This can lead to a lack of focus and a lack of direction in the solution process.</p> <p>4. The fourth problem is the lack of a clear understanding of the stakeholders. This is often the case when a problem is first identified, and the stakeholders are not fully understood. This can lead to a lack of focus and a lack of direction in the solution process.</p> <p>5. The fifth problem is the lack of a clear understanding of the goals. This is often the case when a problem is first identified, and the goals are not fully understood. This can lead to a lack of focus and a lack of direction in the solution process.</p>
